Table 3. Number of Patients Treated, DALYs Averted, Costs, and CERs at an 80% Coverage Level, Over a 10-Year Period (2000–2010) by WHO Region

Region and intervention	No. of patients treated	Total DALYs averted
-------------------------	-------------------------	---------------------

DALY averted in North America, and \$62 and \$75 per DALY averted in Asia (Table 3). The least cost-effective option was stage IV treatment (average CERs of \$4986, \$70b380, and \$3510 per DALY averted in Africa, North America, and Asia, respectively).
