

Collaborating Partners International Agency for Research on Cancer (IARC)
Bhagwan Mahaveer Cancer Hospital & Research Centre (BMCHRC)

Service Base Hospital

Location Jaipur, Rajasthan State

Purposes Research on screening methods and on the “see, see, treat” treatment approach.

Age Group 30-59 years

Number of women studied/served 6,000

Project Study Period 2001-2003

Key Study Questions or Service Delivery Strategy

1. To estimate the performance of cytology, visual inspection with acetic acid (VIA), and visual inspection with Lugol's iodine (VILI) in detecting cervical intraepithelial neoplasia (CIN).
2. To evaluate the “see, see, and treat” approach in routine healthcare settings for feasibility, safety, acceptability, and the extent of overtreatment.

Date results expected Preliminary results: June 2003
Final results: by July 2004
