

# Atlas of VISUAL INSPECTION OF THE CERVIX

with acetic acid (VIA) for screening, triage, and assessment for treatment

Useful to learn how to:

Perform VIA as a primary screening test

Perform VIA to triage women with positive HPV tests

Determine eligibility for ablative treatment

## What are the atlas's special features?

Practical tips to guide day-to-day practice

Procedures explained step by step using images and videos

186 Case studies with cervical images

Random quiz to self-assess interpretation of cases

All images can be freely downloaded for continued learning

This atlas is an **online manual** that describes the use of VIA as a **primary screening test** or as a **test to triage HPV-positive women**, and provides techniques to determine eligibility for ablative treatment.
